

Product/Service Engineer

Intelligent Imaging Systems Inc. is a supplier and integrator of some of the most advanced imaging systems today. We provide transportation and law enforcement agencies with the industry's most technologically advanced tools in an effort to make the goals of safety and security more efficient and effective.

We have developed a suite of integrated technologies that include thermal imaging, digital imaging, radiation detection, and laser scanning systems. Our technologies, our expertise and our cultivated partnerships with proven technology providers enable us to create the most advanced safety and security enforcement systems available in the marketplace today. Our core markets are transportation safety and security, law enforcement and public security.

Our small and quickly expanding company is seeking candidates for a Product Engineer, to begin immediately.

Requirements:

- ☞ A degree in engineering from a recognized university
- ☞ Strong interpersonal skills and positive attitude which you will utilize in a team and customer oriented environment
